- Jekyll
- CSS (Precompilers like Sass, Less)
- Git
- Firebase
- Segment (Used for tracking user data)
- Iterable (Used to deliver notifications and emails)
- Figma
- Illustrator
- Photoshop
- Elixir
- Phoenix framework
- Ruby on rails

LANGUAGES

- Spanish (Native)
- English (Advanced)

WORK EXPERIENCE

Hitrecord / Michelada   **January 2021 — Present**

Front End Developer

I'm currently working as a frontend developer for **Hitrecord** through Michelada (Staff Augmentation Company)

My responsabilities are:
- Development of new features
- Fix bugs
- Write tests
Stack I use in this project:

- Angular 9+ (NgRx, RxJs)

- Cypress (Testing)
- Iterable (for sending emails, push notifications).
- Segment (Third party used to track events and get user data)

Zentrego   February 2020 — July 2020
Developer

Collaborated in the redesign and migration of former Angular 1 platform to VueJS Framework.
- Used Vuejs for the front-end
- Used Firebase for backend
- Collaborated in the design process
- Used Git for version control

Ruksack   Agust 2019 — January 2020
React Developer

Collaborated getting out an MVP of their product.

- Helped them build a react guide creator with a backend in RoR.
- Implemented libraries like Unsplash js to insert photos
- We used Context API to pass data through the component tree without having to pass props down manually at every level.
- We used React portals to implement hover cards
- Implemented drag and drop functionality

Bunsan   August 2017 — August 2019
Front End Developer

- Collaborated as front-end **Angular 2+** Developer in the development of several apps for Inee (Federal Mexican goverment)
- Collaborated as a frontend **Angular 2+** developer in the development of an app to compare bike models for Italika.
- Built an app to manage bunsan's projects and clients using **Angular 2+** and **Phoenix framework** (Elixir) as an api.
- Collaborated as a frontend **Angularjs** developer for gubler.co (like uber for doctors) in the implementation of new features.
- Collaborated as a frontend **Angularjs** developer for metrics.digital (social media analytics) in the implementation of new features.
- Collaborated in the development of an Api connector for Chedraui using **Phoenix Framework** (Elixir).

Byeo Corp.   Oct 2016 — Jun 2018
Full Stack Developer & UI Designer

Byeo is an app to store and organize your legacy, record and schedule videos, manage insurances and inheritances.
- I designed the new version of the app
- Collaborated in the data architecture design along with a backend developer
- Collaborated in the development of a **Ruby on Rails** Api.
- Built webapp from scratch using **Angular 2+**
- Collaborated in the development of the IOS and Android apps using **Ionic Framework**

Lefuse   June 2011 — Oct 2016

Consultant Web Developer & Designer

- Designed and developed a system to manage rental assets for a real state company, where I used **Ruby On Rails** and **jQuery**.
- Designed and developed a system to manage projects for a constuction consulting company where I used **Ruby On Rails**, and **jQuery**.
- Worked on several websites for local companies using web technoligies like **jQuery** and **Codeigniter**.

Piñata Software   March 2015 — Present

Consultant UI Designer / Front End

- Migration of CodeSync former website to Jekyll Framework
- Design and development of ElixirConf Europe website
- Developed an education app where you can apply tests and share resources like videos, documents, audios, etc. It was built in **Angular 2+** and **Firebase** as backend.
- Designed and developed an app to manage accounting and make reports using **Angular 2+** and **Firebase** as a backend.
- Designed and developed a website with a custom CMS in A**ngular 2+** using **Firebase** as a backend.

Redesign of terradatum.com Worked on several websites for local companies using web technoligies like **jQuery** and **Codeigniter**.

RECENT PROJECTS

Code Sync

Migrated former website to Jekyll

https://www.codesync.global/

Elixir Conf EU

Developed the Elixir Conf Europe website using Jekyll

https://www.elixirconf.eu/

Dacodex

Development of Dacodex website using Jekyll

https://dacodex.mx/
